PROFILE

AI and full-stack engineer focused on practical AI products, internal business systems and automation. Built sales automation for Neo Motors and end-to-end AI applications spanning agentic workflows, PostgreSQL-backed services, real-time features and Docker-based delivery.

EXPERIENCE

Software Engineer - Internal Sales Automation | Neo Motors

2026

- Built an internal CRM and automation platform for the sales team, covering lead management, commercial pipeline, auditable tasks and reminders, test-drive workflows, quotations and delivery follow-up.
- Implemented secure authentication and capability-based access, team management, audit trails, Google Sheets import and operational dashboards for sales and management visibility.
- Designed automation around repetitive sales operations, including reminders, workflow ownership and a WhatsApp integration foundation.

SELECTED PROJECTS

Ryvo | AI Financial & Automation Platform

2026

- Built an AI-powered financial workspace with Next.js, FastAPI and PostgreSQL, combining dashboards, financial data and conversational analysis.
- Developed an agentic chat engine with RAG over financial records and business briefings, with deterministic validation of numeric claims before responses are returned.
- Containerized the application with Docker and designed the system around secure APIs, structured data flows and reliable AI-assisted analysis.

Mojib | AI Assistant for Businesses

2026

- Built an AI assistant platform for businesses including clinics, restaurants and real-estate teams.
- Designed conversational workflows for appointment booking, order intake, lead qualification and customer support.
- Connected AI conversations to structured business actions through backend APIs and automation workflows, creating a deployable assistant for business websites.

TECHNICAL SKILLS

Languages	C, C++, JavaScript, TypeScript, Python, SQL
Frontend / Backend	React, Next.js, Node.js, FastAPI, REST APIs, Webhooks, Socket.IO
AI / Automation	LLM APIs, agentic workflows, RAG, structured extraction, n8n, prompt-safety boundaries
Data / Delivery	PostgreSQL, Docker, Docker Compose, Git, GitHub, Linux, WAHA / WhatsApp integration

EDUCATION

1337 Coding School | 42 Network / UM6P, Morocco

2024 - Present

- Project-based software engineering curriculum focused on systems programming, networking, algorithms, teamwork and production-oriented problem solving.
